Quality Components

Kiln Dried Woods

We use only properly dried woods of 7% & less moisture content! This is an important factor that many people are unaware. If the wood is not dried to 7% or under you actually have a low quality product. The reason for this is that wood shrinks when it dries. Imagine if you build something with wet wood, and it dries over time in your home environment. This is how splits, cracks, & warps happen. I'm sure you can see why it would be a low quality product!

This is why all of Our wood is dried to 7% or less because this is the point of moisture your home environment will maintain in woods!

The splitting, cracking, & warping is done before we build. The bad is cut out, and you are left with a premier quality product you will be proud to resale or put into your lifestyle.

Premier Finish

This is the closest resemblance we can give as to the quality of the finish on our premier products!

The grain of the wood is the only difference between your catalog paper and our finish! Some woods naturally have less of a grain feel than others. Below is a listing of woods that you can feel the most grain & the least. Some of the woods with the most grain feeling are species of Oak, Ash, & Elm --- This is due to the open nature of the grain. Some of the woods with the least grain feeling are species of Alder, Walnut, Cherry, & Maple ---- This is due to the tighter nature of the grain.

We apply our finish with the finest finishing materials & spray equipment in the industry! Our finish is a close guarded secret of 2 generations of experience in fine woodworking!

IT HAS BEEN TRIED AND TESTED. IT'S PREMIER.

Our finish is free from dust, dirt, & foreign contaminants, & our wood is sanded to the right level to insure a premier finish! This applies to all of our products except any economy products!!!!

Hanging Methods

The first, the best, & the only in the Industry! We engineered & built the machine that completes this process. This design completely hugs the wall. Keyholes are normally just a slot that is next to impossible to make tight. We have created a tapered process that is far ahead of our competitors!

These slots are found on all of the plaques & wall hangings we sell, except for the shelving that require drilled holes. All shelving is equipped with hanging holes that are 16" on center to catch the studs in most homes. The hanging holes come with caps to cover the screw heads.

Wagler Woodcrafts, Manufacturing

605 N. Parkway

Wayland, IA 52654

(319)256-9663

Owner: Curt Wagler

This business is a trade that has been passed down generation to generation. Curt's grandfather started woodworking as a hobby, his dad, Delmer expanded on that by building home interior items for retail. Curt then expanded the business into manufacturing as well as retail. We now offer premiere quality wood, plastic, & metal products.

The business started out in a small shop behind Curt's father, Delmer's house & last July was the Grand Opening for Curt's new building in the Wayland Industrial Park.

In the last year since opening the new facility Curt has met the challenges of a growing business with:

- Bigger machinery to produce a higher volume of parts & products
- Added more room in the facility for a large computer itemized packing room
- Added more room in the facility for a top of the line custom assembly room
- Added a new design your own kitchen cabinet center with a one of a kind hands on build your own cabinet door for the convenience of our customers
- More clientele from not only individuals but from factories & big businesses as well
- An increase in wholesale sales in the U.S. & overseas. The increase is largely due to local factories & retailers learning about our competitive rates, diverse offerings, & small & large quantities.
- Due to our in house website, web sales are on the rise daily
- One of Curt's biggest challenges is building a lot of his own specialized automated & conventional types of machinery to keep the facility running efficiently for a business that continues to grow on a daily basis

Shipping and Delivery Terms

All items are priced FOB Factory.
Shipping and/or delivery are charged per individual order.

If the item is small enough to ship UPS, Fed Ex, or USPS, the shipment charges are by amount of sale for up to 5 item purchases.

These prices are not eligible on items totaling over 50 pounds!

We ship by UPS, FED EX, or USPS for small shipments, at our disgression. We also, will charge recievers account if requested (which eliminates shipping charges from us on invoices). You would pay the carrier directly. If this is your preference, please put your shipper # in the shipping price box & mention the carrier.

Sorry, No COD's.

<i>Purchase Price</i>	<i>Shipping Charge For Shipments in the US only</i>
\$0.01 - \$9.99	\$5.00
\$10.00 - \$49.99	\$9.00
\$50.00 - \$99.99	\$15.00
\$100.00 - \$199.99	\$20.00
\$200.00 and over	\$25.00

For large shipments, we use insured freight haulers. Most shipments go by PANAMA TRANSFER. We get great rates on large shipments out of our dock but we can't guarantee rates on large shipments as they are dependant on weight. The charges are added to the invoice or charged COD. Your choice!

If you request a quote for your production needs, we can possibly set a solid freight rate for your company's products!

Delivery

There is \$48 minimum fee for delivery or \$1.10 per mile.

We will deliver or ship by large truck, whichever is more economical for the customer.

To keep our shipping and delivery costs down, some minor assembly may be required on bulky items, such as tables.
